

# Turn Data Overload Into Mission-Critical Intelligence

Replace fragmented DIGINT operations with a unified, AI-powered platform that delivers mission-ready intelligence — so your analysts focus on insights, not data processing.

## Precision-Engineered for Maximum Impact

### Streamlined DIGINT Workflows

Transform chaotic data streams into organized, actionable intelligence. Reduce errors and accelerate analysis with automated collection and processing.

### AI Tailored to the Mission

AI designed specifically for DIGINT operations. Delivers intelligent collection, synthesis, and explainable results that align with your mission objectives.

### Executive-Ready Outputs

Converts raw data into clear, actionable reports. Gives decision-makers the speed and confidence they need for critical missions.

---

## New in Discovery

### Person Search

Start with a single identifier and instantly map every connected data point to an individual. Replace fragmented manual lookups with structured, confidence-scored identity resolution.

### Translation

Translate foreign-language source material, craft queries in target languages, and produce analyst-ready English outputs. Terminology guides ensure consistent, mission-accurate language across your team.

## See Discovery in Action.
