

Global Innovation at the Intersection of Technology and National Security

Orbis is an international firm delivering scalable technology, consulting, and training to national security and commercial clients worldwide. With deep mission expertise and proven platforms, we help leaders solve their hardest problems with confidence and speed.

Catalyst

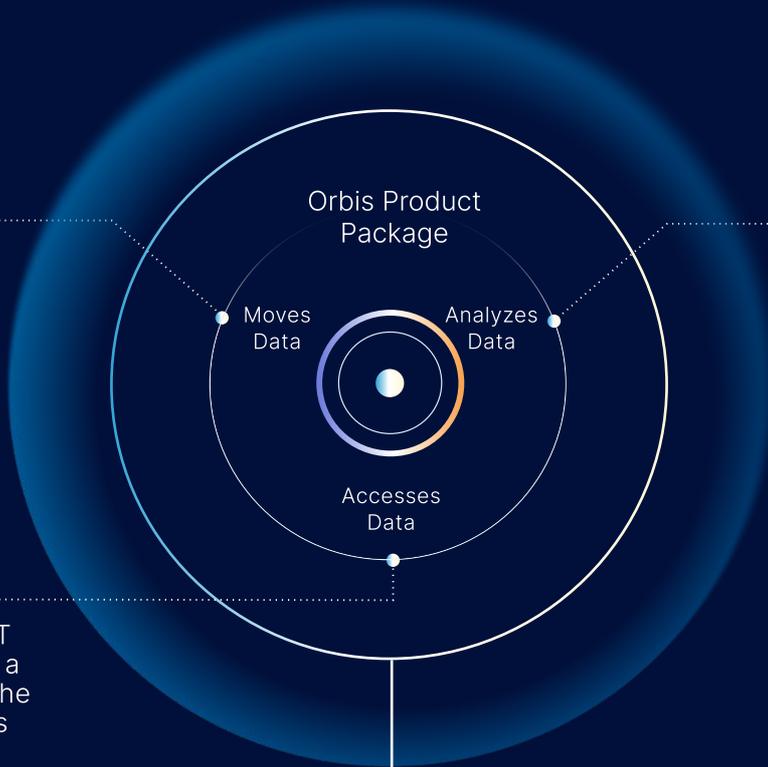

Connects systems, sensors, and decision-makers through a secure, virtual data mesh. Unifies fragmented data without relocating it

Unified, curated DIGINT data delivered through a single API. We handle the engineering so analysts focus on analysis.

Discovery

AI-guided DIGINT orchestration with real-time recommendations and secure non-attribution operations.

S U P P O R T I N G S E R V I C E S

Digital Intelligence Reports

Rapid, actionable intelligence to inform critical decisions.

Solutions Engineering

Assess media narratives, monitor brand exposure, and verify the authenticity of public discourse.

Intelligence Training

Build your intelligence capability with courses taught by experienced practitioners, available at beginner, intermediate, and advanced levels.

International and Domestic Service Offerings

Who we are

Orbis' dedication to advancing international security runs deep into everything we do. Our team of security professionals understands the gravity of today's threats, the magnitude of the challenges we face, and how to achieve successful outcomes.

MISSION

We help protect national interests and global allies by delivering smart, mission-ready solutions, combining technology, data, and expertise to solve real-world challenges.

VISION

To be the go-to partner for solving the hardest national security and business problems, trusted around the world for our impact, innovation, and integrity.

Why Orbis?

Whether you're a government agency seeking to enhance your nation's security posture or a private organization aiming to protect your assets, Orbis is your trusted partner. With a commitment to excellence and a focus on safeguarding what matters most, we are dedicated to shaping a more secure future. Let's talk.
